EXPERIENCE

Frontend Engineer - FXDX

Full-Time - (On-site)

Bengaluru, India

November 2023 - Present

- Led the development of the FXDX exchange frontend, aiming to achieve a 30% improvement in load times and a 20% increase in user engagement. I implement SEO best practices to ensure the product ranks well in search engine results.
- I collaborated closely with cross-functional teams to streamline the development process for the FXDX exchange. In doing so, I aim to reduce project delivery time by 20% while adhering to coding best practices for a user-friendly and efficient interface.
- Restructured and rebuilt an open-source project, transforming it into a proprietary, high-performing product tailored to business requirements, enhancing functionality and scalability.
- Leveraging expertise in JavaScript, ReactJS, NextJS, React-Native, TailwindCSS, Socket.io, Wagmi, Node.js, Express.js, and Zustand to deliver high-quality, scalable, and performant solutions.

Web Developer - AppSynergies

Internship - (Remote)

London, UK

August 2023 - October 2023

- Proactively leveraged proficiency in agile and Scrum methodologies in a remote environment. I streamlined project timelines by 20%, enabling seamless collaboration across cross-functional teams and accelerating product development and timely delivery.
- Formulated and coordinated with a team of 9 people and enriched existing system metrics by 19%. Projected annual revenue boosted by \$250k by implementing optimised business logic through code.
- **Skills:** Javascript, Next.js, TailwindCSS, API Integration, Authentication, Firebase, SEO.

PROJECTS

Links are provided as hyperlinks.

ShopIN (work in progress)

[\(Live\)](#) | [\(GitHub\)](#)

- Developed ShopIn, an e-commerce web application with advanced product filtering, sorting, pagination, wishlist, profile management and user authentication. Built with Next.js, Typescript, TailwindCss, MongoDB, Shadcn, Auth.js, Zustand.
- Implemented SEO best practices, improving the platform's visibility and rankings in search engine results.
- Features include responsive design and a streamlined shopping interface, ensuring an efficient, user-friendly experience.

Car-O-Bar

[\(Live\)](#) | [\(GitHub\)](#)

- Crafted an innovative car renting web app with 3+ advanced filtering systems and integrated RapidCar API, featuring 35+ carmakers for extensive selection.
- Leveraged Stripe with Next.js, TypeScript, and TailwindCSS, reducing cart abandonment by 40%.

MoviesHere

[\(Live\)](#) | [\(GitHub\)](#)

- Engineered a user-friendly MoviesHere app with a dynamic search feature for real-time movie results, showcasing 10+ trending movies with posters and titles on the homepage. Clicking on a film provides comprehensive 5+ details.
- Enhanced user experience with a responsive design for all devices and a movie recommendation system that refines 10+ suggestions based on user preferences, allowing users to mark movies as "liked" or "disliked."

CERTIFICATIONS

freeCodeCamp.org | Front End Development Libraries - 300+ hours

April 2023 | [\(Link\)](#)

freeCodeCamp.org | Javascript Algorithms & Data Structures - 300+ hours
